EBCA MULL 9920

Edition 3-2021

EBCA MULL 9920 IS AN AQUEOUS DISPERSION OF POLYVINYL ACETATE EMULSION WITH SOFTENER.

Typical SPECIFICATIONS

Appearance	Milky, white viscous paste
Polymer type	Non – plasticized aqueous Poly vinyl acetate dispersion.
Ionic nature	Non-ionic
pH	5-7

APPLICATIONS

EBCA MULL 9920 is an aqueous dispersion of polyvinyl acetate emulsion with high bonding strength.

EBCA MULL 9920 is suitable for textile fabrics.

EBCA MULL 9920 has conventional defoamers that can be used for inhibition of foam formation.

Best results in textile application are obtained under padding systems for soft and full handle using concentrations of 5-20g/l. Curing is carried at 120-130 °C for 1-2 min.

PACKAGING

125Kgs plastic drums.

STORAGE

This product has a shelf life of 12 months in the original closed container at temperature between 5oC, 30oC. Once container have been opened, the contents should be used directly, container should be closed tightly after each use.

The Technical data ascertained by our quality control laboratory at the time of product release may vary according to the storage time and storage conditions and may deviate from the stated limits.

These suggestions and data based on information we believe to be reliable. They are offered in good faith, but without guarantee, as conditions and methods of use of our products are beyond our control. We recommend that the prospective user determine the suitability of our materials and suggestions before adopting them on a commercial scale.

Egyptian British Company maintains Material Safety Data sheets (MSDS) on all of its products. These contain important information that you may need to protect your employees and customers against any known health and safety hazards associated with our products. We recommend you to obtain copies of MSDS for our products, from our technical representative, and obtain copies of MSDS from your suppliers of other raw materials used with our products.
